Identification of Slow Learners and Fast Learners:

Slow Learners Identification:

- Slow learners are identified by Subject faculties, Class coordinators and mentors.
- Slow learners are those students who received the lowest scores possible in the Continuous Internal Assessment, as well as those with backlogs and low attendance rates.
- Students who are not able to follow lectures properly are also identified by the subject faculties and mentors.

Slow Learners Follow up and Flexibilities: Special classes are conducted with a minimum number of students in addition to regular class hours to help slow learners and to increase their learning levels and capacity. It gives students further guidance on how to understand the subject properly. Slow learners are occasionally evaluated depending on how well they perform in subsequent “Continuous Internal Assessments”. In addition to special classes, the concerned mentor also provides advices to the student by suggesting different subject-related learning materials and online resources. Slow learners can gradually develop with this supervision.
