Special Class for fast learners

Summer Semester 2023 2024

16.11.2023

10210ME201 - Engineering Graphics

Topic: Special Curves

1. Construct an epicycloid generated by a rolling circle of diameter 50 mm and a direct circle of diameter 150 mm. draw the tangent and normal to the curve at any point the epicycloid.
2. Draw the curve traced out by an end of a thin wire unwound from a regular hexagon side 15 mm, the wire being kept tight. Draw a tangent and normal to the curve at a point 90 mm from the centre of the Hexagon.
3. An inelastic string of 150mm long has its one end attached to the circumference of a circular disc of 40 mm diameter. Draw the curve traced out by the other end of the string when it is completely wound around the disc keeping the string always tight. Name the curve obtained. Draw the tangent and Normal to the curve at a point distant 100 mm from the centre of the disc.

Fast learners report

Action taken:

1. Conducted special classes after completion of Mid term 1.
2. Students are taught content beyond the syllabus which help them to understand the important topic detail. Students are taught with open ended problems which help them to enhance their knowledge
3. Given study materials
4. Special care was taken of individual students.

Impact observed:

5. Mid term2 mark is consistent when compared to Mid term1.
6. Fast learners' performance is consistent in the end-semester examination also.
