TRAINING ON HOW TO CONDUCT AN EFFECTIVE LITERATURE AND PATENT SEARCH: TOOLS AND TRICK FOR THE TRADE

organized by

Bio Incubator and Lab, Vel Tech Technology Business Incubator,
Vel Tech Rangarajan Dr. Sagunthala R & D Institute of Science and Technology

About Vel Tech Technology Incubator Center

Vel Tech Technology Incubator Center at Veltech Dr. RR and Dr. SR University, Chennai was established in year 2010 in joining hands with Department of Science and Technology (DST), Government of India . It has seven thrust areas research which includes Automobile; 3D printing; Embedded systems/VLSI; E-waste , Plastic waste and Bio-waste management; MAV/Robotics; IT/ITES Services and Renewable Energy. It also provides financial assistance to deserving Entrepreneurs to convert their innovative ideas into commercial viable products.

About the training programme

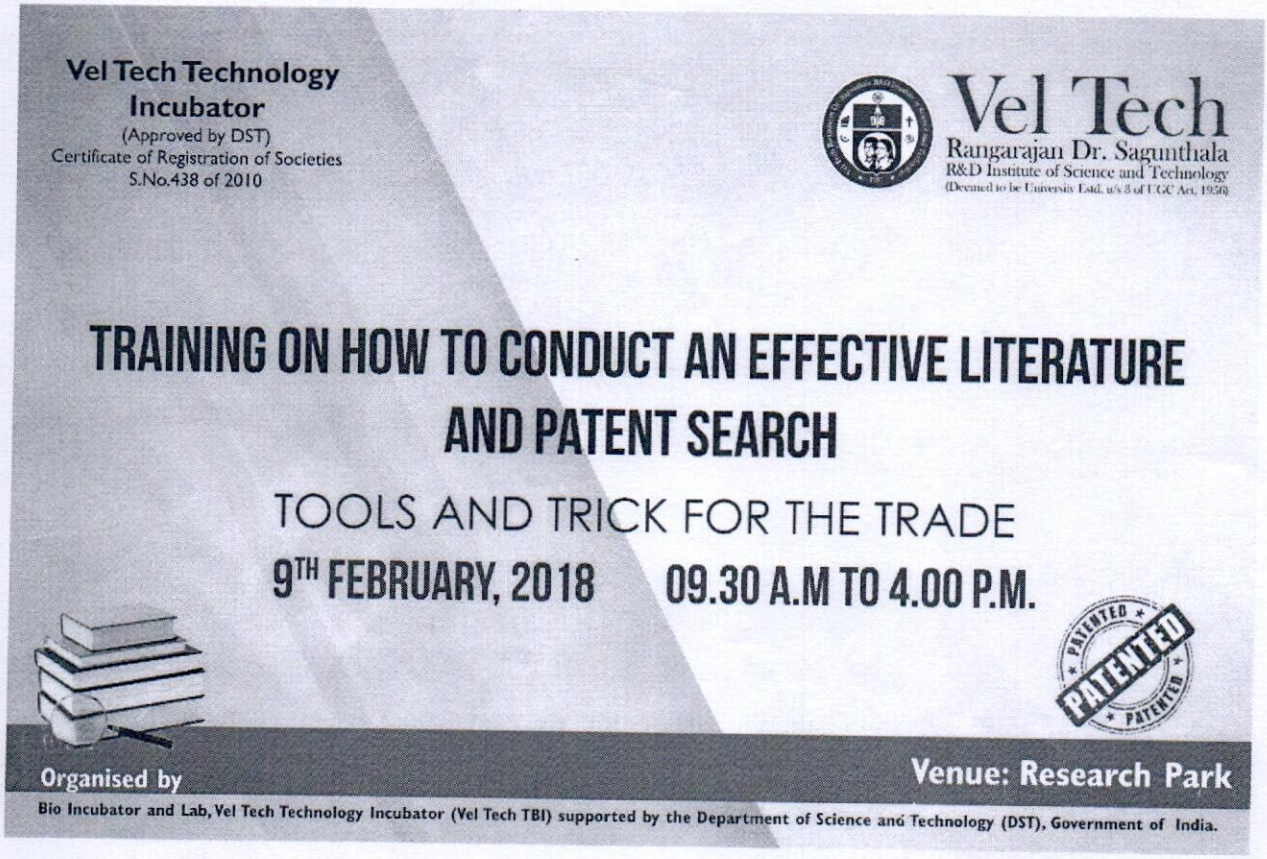

•Effective literature searching is a crucial stage in the process of writing a literature review, the significance of which often overlooked.
•Although many current textbooks refer to the subject, information is often of insufficient depth to guide an effective search.
•It has been estimated that up to 30% of all R&D expenditure is wasted on redeveloping existing inventions.
•Most of these unnecessary costs can be avoided by searching existing knowledge on a topic first. While many researchers diligently go through scientific literature and books, they often forgot about patents.
•Patents are a large, up to date source of information on applied science and technology, and should be included in all state-of-the-art searches.
•Patents contain a lot of information that is not published in scientific journals.
•The European Patent Office (EPO) claims that up to 80% of current technological knowledge can only be found in patent documents.

This training programme outlines important considerations in the search strategy and recommends practical advice for students /researchers to ensure best use of their valuable time. It is suggested that a systematic, organized search of the literature and patent, that uses available resources effectively, is more likely to produce quality work.

Programme date: 9th February, 2018.
