1(TN) Air Sqn NCC of NCC Gp HQ Madras B conducted an Aeromodelling Training capsule for Air Wing cadets. The primary objective of this event is to train the cadets on all types of Aeromodelling activities that are a part of their syllabus, keeping in mind the forthcoming All India Vayu Sainik Camp.

Then we got the opportunity to meet the CEO of Air Force Station and the Technical Director. We cleared all our doubts regarding our graduation course and all the other queries we had in my mind. At first, we was a bit nervous as we were sitting in the CEO office but leisurely we started to feel more confident as we asked my first question to them. All other Cadets were also listening patiently. Then we started exploring the walls of the air force station which were covered by the charts and other useful information and then we got to the Air Traffic Control site from where we can see the Fighter Aircrafts Getting controlled.
