Educator Readiness

Developing expertise to teach RPA to Technical Students

Thank you for joining the UiPath Academic Alliance program. This document guides you to prepare to teach the first formal course **Robotic Process Automation Design and Development** available May 2019.

*We kindly ask you to use the same university-provided email address throughout the UiPath ecosystem:

- Academic Alliance Online Agreement
- UiPath Academy
- Community Edition Download
- UiPath Connect

As you prepare to teach UiPath provided course material to your students, the very first step is for you to feel very comfortable and confident before your first lecture. You want to know a lot more than what you will teach. Before you review the course RPA Design and Development, it will be very useful to learn, practice, and even get certified using the following assets available at no cost to you.

1. Download UiPath RPA platform. Install UiPath software* (Community Edition) on your Microsoft Windows™ computer. This is the same software that you will use to teach your students in the class. For now, you can get familiar with the platform, practice processes automation, build your robots, and even automate your own processes to save time from repetitive processes. You are licensed the software and it will renew automatically as long as you have internet connectivity to your computer.

2. Training. Sign up for UiPath Academy* to start learning and practicing. You have access to many online courses. At a minimum, we recommended that you complete the following courses for which we have built a custom Learning Plan that can be accessed on this link.

RPA Awareness Training

2 Hrs.

Online

This course is centered on RPA fundamentals: the definition of RPA, the way in which companies are exploring this technology, and the benefits that can be attained using it. The lessons also include guidelines on selecting the appropriate processes for automation, and strategies for successful RPA implementations.

RPA Developer Foundation Training

30 Hrs.

Online

Dedicated to beginner-level users, the RPA Developer Foundation Training is designed to walk you through the essentials of UiPath. Covering theoretical concepts as well as hands-on exercises and quizzes, this training will enable you to build a good knowledge of UiPath features and technology.

UiPath Orchestrator Training

4-5 hrs.

Online

This module presents the basic and advanced Orchestrator features and functionalities. The course includes a set of practical exercises that can be done in the free training environment.

RPA Developer Advanced Training

40 Hrs.

Online

Building on top of the RPA Developer Foundation training, this course explains how to leverage all the functionalities of UiPath Studio through the means of a specially built application that simulates the production environment experience. The module focuses on a hands-on approach following the carefully articulated best practices that empower users to build clean and efficient automation solutions.

3. **Certification.** Once you have successfully completed the above courses, it is very likely that you are ready to test your knowledge and get certified*. Though it is not a requirement for you to teach your class, it's worth your consideration.

RPA Developer Advanced Certification

Online: Quiz – 1.5 hrs.

Practical Exercise – 3.5 hrs.

Online

The Certification exam tests that you have attained in-depth knowledge about RPA and UiPath components and features. It also validates your ability to successfully automate a real-life project based on UiPath best practices and automation principles.
