ABOUT THE STTP

Data Science is a diverse field for developing applications of products through Statistical and Quantitative Data Analytics, Data Mining, Machine Learning, Big Data technologies and Soft computing techniques in the areas of Urban development, Health care, Agriculture, Social media, Education and Governance. Objective of this seminar is to share knowledge on machine learning techniques that is applied in the field of IoT & Big Data. It will give insights on industry level exposure towards Big Data & IoT application development.

The topics to be discussed include:

- (i) Machine learning techniques for IoT data
- (ii) Application of Big Data to Smart cities
- (iii) Process improvement in the era of data science
- (iv) Deep learning of IoT and applications
- (v) Intelligent Optimization Techniques
- (vi) Wireless Technologies for Smart cities
