

Faculty Feedback on Curriculum 2025-2026

1. Suggested providing greater exposure to programming courses and internship opportunities to enhance students' technical knowledge and industry preparedness.
2. Recommended to introduce the practical based Assignment to improve their communication and presentation skills.

Action Taken: Academic Year 2025-26 Curriculum Feedback

Programming-oriented courses, coding practice sessions using Neo Colab, and internship opportunities from the second year onwards were introduced to enhance students' technical knowledge and industry preparedness. Practical-based assignments, seminars, and presentation activities were also incorporated to improve students' communication, presentation, and practical skills.

School of Computing

Department of Artificial Intelligence and Data Science

Students Feedback on Curriculum 2025-2026

The students are the most important stakeholders of B. Tech Artificial Intelligence and Data Science Programme. In the academic year 2025-2026, suggestions collected in the form of structured feedback from B. Tech AI&DS students. The feedback from students on the curriculum has been received, and the key suggestions are summarized below:

1. Appreciated the inclusion of practical and industry-oriented learning methods in the curriculum.
2. Students suggested increasing internship opportunities, industry exposure, and advanced technology-based courses for better career readiness.

The feedback survey evaluated ten key aspects of the B.Tech. Artificial Intelligence and Data Science curriculum. The ratings provided valuable insights into the program's effectiveness: Based on the collected student feedback across 12 key academic and institutional parameters, the overall sentiment toward the educational experience is predominantly positive.

1	How do you rate the teaching resources for your learning?
2	How do you rate the laboratory facilities provided by the institute?
3	How do you rate the faculty support for your learning?
4	How do you rate the mentoring system of the Institution?
5	What extent have you acquired necessary technical through your courses?
6	What extent have you acquired necessary soft skills through your courses?
7	How do you rate the practical/hands-on experience provided in the curriculum?
8	How effective were the projects in simulating real life experiences?
9	How do you rate the level of readiness for industry roles and challenges after graduation?
10	How do you evaluate the career guidance provided during your studies?
11	To what extent do you feel that the curriculum meets your professional needs?
12	How satisfied are you with our examinations system?

The student feedback analysis for B.Tech. Artificial Intelligence & Data Science (2025–2026) indicates a highly positive response toward the overall academic and learning environment of the institution. Approximately **72%–85%** of the students rated the teaching resources, laboratory facilities, faculty support, mentoring system, and practical learning experiences as **“Extremely High”** and **“High.”** Students expressed strong satisfaction with faculty guidance, availability of learning resources, laboratory infrastructure, and the institution’s efforts in providing hands-on experience through projects, workshops, and curriculum-based activities. Around **80%** of the respondents agreed that the curriculum helped them acquire the necessary technical and soft skills required for academic and professional growth.

The survey further reveals that nearly **78%–88%** of the students felt confident about their industry readiness, project exposure, and professional development opportunities provided during the course of study. Career guidance activities, mentoring support, and industry-oriented projects were positively appreciated by the students. In addition, around **82%** of the students expressed satisfaction with the curriculum structure and examination system, stating that the evaluation methods were fair and supportive of continuous learning. Overall, the feedback report reflects a high level of student satisfaction with the Department of Artificial Intelligence & Data Science and highlights the institution’s commitment toward delivering quality education and industry-relevant learning experiences.

Action Taken: Academic Year 2025-2026 Curriculum Feedback

Based on the student feedback, industry-oriented subjects such as **Python** and **Quantum Neural Networks** were introduced into the curriculum to enhance students' technical knowledge, practical skills, and exposure to emerging technologies relevant to current industry requirements.

Based on the student feedback analysis few courses were introduced and some courses were revised in the curriculum under various category:

SNO	COURSE NAME	CATEGORY	BOS REFERENCE
1	Python for Data Science	Program Core	11 th BoS
2	Quantum Neural Networks-Theory and Practice	IHL	11 th BoS

Industry Feedback on Curriculum 2025-26

The industry are the most important stakeholders of B. Tech Artificial Intelligence and Data Science Programme. Suggestions collected in the form of structured feedback from the industries. Received industries feedback on curriculum and the major suggestions are listed below:

1. Suggested incorporating value-added courses related to computational thinking and problem solving using Java to bridge the gap between academic learning and industry requirements.
2. Recommended strengthening practical exposure through internships and live projects to enhance students' professional readiness, technical competency, and employability skills.

Action Taken: Academic Year 2025-2026 Curriculum Feedback

Based on the feedback received from industry experts, the curriculum was enhanced by introducing problem Solving using Java and Python and Quantum Neural Networks, and to improve students' knowledge in emerging technologies and data-driven decision-making. Additional initiatives such as internships, live projects, workshops, and expert interaction sessions were also organized to strengthen practical exposure and enhance industry readiness among students.

Based on the feedback analysis few courses were introduced:

SNO	COURSE NAME	CATEGORY	BOS REFERENCE
1	Python for Data Science	Program Core	11 th BoS
2	Quantum Neural Networks-Theory and Practice	IHL	11 th BoS
3	Computational Problem Solving using Java	VAC	11 th BoS

Alumni Feedback on Curriculum 2025-26

The alumni are valuable stakeholders of the B.Tech. Artificial Intelligence and Data Science programme, contributing significantly to its continuous development and relevance. Feedback was collected from alumni working in diverse industries and academic domains. Their insights, based on real-world experience and evolving technological demands, are instrumental in strengthening the curriculum. The major suggestions received from alumni are listed below:

1. Suggested enhancing the curriculum with more industry-focused courses and practical components to meet current market demands.
2. Recommended providing training on Data Analytics tools to improve students' analytical skills and industry readiness.

Action Taken: Academic Year 2025-26 Curriculum Feedback

Based on the feedback received, the curriculum was strengthened by introducing industry-oriented such as Programming related to Java and python and Power BI for Data Analytics training is given to the students to improve the tool usage in data analytics.
