

competition SUCCESS review

India remains a hub of engineers, being one of the countries which produce a very high number of engineers each year. Engineering continues to be one of the most sought after careers in India, because 'Engineering' as a degree has been pivotal in offering bright career prospects, even during the times of economic gloom. This scenario has led to the providers of Engineering Education constantly innovating the curriculum and related pedagogy to keep abreast of the changing times. If we look at the H1B visas, India alone is the recipient of more than 50% of H1Bs issued by the US. The most prominent bidders are the software companies in India. Engineers comprise more than 90% of the talent-pool that India sends abroad.

There are 4,804 Engineering Colleges in India offering BTech, MTech and PhD degrees in multiple specialisations like CSE, Electronics, Mechanical, Civil, Electrical, Biotech, etc. These include 3,982 private and 822 government Engineering Colleges. With all these institutions vying to match the best in the world, the Engineering Education and the resultant professionals are all headed to a bright future, even in the most turbulent economic times.
